Travis Kelchen was born with an Ebstein Anomaly, a serious heart defect that causes the blood to pump backwards inside the heart. Travis is 31, and after experiencing some symptoms that brought concerns, he visited experts at the Mayo Clinic and was admitted to the hospital on March 23. On May 13, Travis received his new heart, but he will have a lengthy recovery in Rochester before he is able to come home, hopefully in mid-August.

Travis has worked at Theisen's in Monticello for many years. Both at work and in the community, he is always willing to help anyone in need without batting an eye.

Join us in supporting Travis as he continues this medical journey!
